InfantSEE Peek-A-Boo Rack Card

Front:

Protect those little eyes!

Infants between the ages of 6 and 12 months undergo a significant amount of development—especially in their eyes and brains. As 1 in 5 preschoolers struggle with vision problems, it is important to have your baby’s eyes checked before they reach 12 months to ensure their vision is developing properly and to help prevent future vision and learning problems.

Schedule a NO-COST eye assessment for your infant.

InfantSEE offers NO-COST eye assessments to infants between 6 and 12 months old.

Find an optometrist at infantSEE.org.
